## SUMMARY

---

Passionate Frontend Developer who has already taken several online courses and personal projects to improve my skills in HTML, CSS, and JavaScript, as well as learned frameworks like React JS and Next JS. I love the challenge and opportunity to create an attractive and functional web interface.

## TECHNICAL SKILLS

---

- Languages : HTML, CSS, Javascript, Typescript
- Technologies : React JS, Next JS, Bootstrap, Tailwind, Zustand, Zod, Axios
- Other : Algorithms, Data Structures, Computational Complexity, Advance Problem Solving.

## PROJECTS

---

- **TukangKU** : An app website where users can register as clients or workers. For clients, they can find and hire home improvement workers based on existing categories and then negotiate with workers to determine the price of the work. For workers, they can accept or reject job offers from clients and also negotiate. This project is created using several frameworks or libraries such as React TS, Tailwind, Shadcn, Zustand, Axios and Zod. This project also integrates API data from the backend team in order to run existing functions or features. The available features such as viewing available workers, making job offers, rejecting jobs, accepting jobs, negotiating, and making payments via Midtrans. See the source on [Github](#).
- **BookVerse**: A digital library in the form of an app website consisting of 2 roles, namely user and admin. For users they can see a list of available books, see the details of the book, and borrow for the book. For admins, they can add books, delete books, change the contents of book details, accept book loan requests from users, and set reversal and borrowing dates. This project is created using several frameworks or libraries such as React TS, Tailwind, Shadcn, Zustand, Axios, and Zod. This project also integrates API data from the backend team in order to run existing functions or features. See the source on [Github](#).
- **Pokemon App** : A website app to view a list of existing Pokemon, view them, catch them and give them a name. This project is created using several frameworks or libraries such as React TS, Tailwind, Shadcn, and Zustand and Axios This project also integrates API data from pokeapi.com in order to run existing functions or features. See the source on [Github](#).
- **Todo App** : A simple Todo App site, you can create a to-do list or note, edit the list, check the list, and delete the list that has been done. This project is created using several frameworks or libraries such as React TS, Tailwind, Shadcn, and Zustand. See the source on [Github](#).

## EDUCATION

---

### ALTERRA ACADEMY

Immersive Program, Frontend Engineer

September 2023 - January 2024

Indonesia

- Immersive Program Frontend Engineering is an intensive 3 months program designed to train future frontend engineers in the fundamentals of software development.
- Course: React JS, Next JS, HTML, CSS, Javascript, Typescript, REST Api, Clean code, Tailwind, Bootstrap, Zustand, Axios, Zod, Git, Figma, Fundamental programming, and Problem solving.

- Capstone Project: Create an website app so clients can find or hire home improvement workers with React TS

## CERTIFICATIONS

---

- Frontend - HTML ([Issued by MySkill September 2023](#))
- Frontend - CSS ([Issued by MySkill September 2023](#))
- Frontend - Javascript ([Issued by MySkill September 2023](#))
- Frontend - React JS ([Issued by MySkill September 2023](#))

## LANGUAGE

---

- Bahasa (Native)
- English (Limited Working Proficiency)
